AGENERAL VIEW OF AN AIR EVACUATION STRIP somewhere in France. The wounded are being transferred from ambulances to the great "Ships of Mercy" which will swiftly carry them to base hospitals.

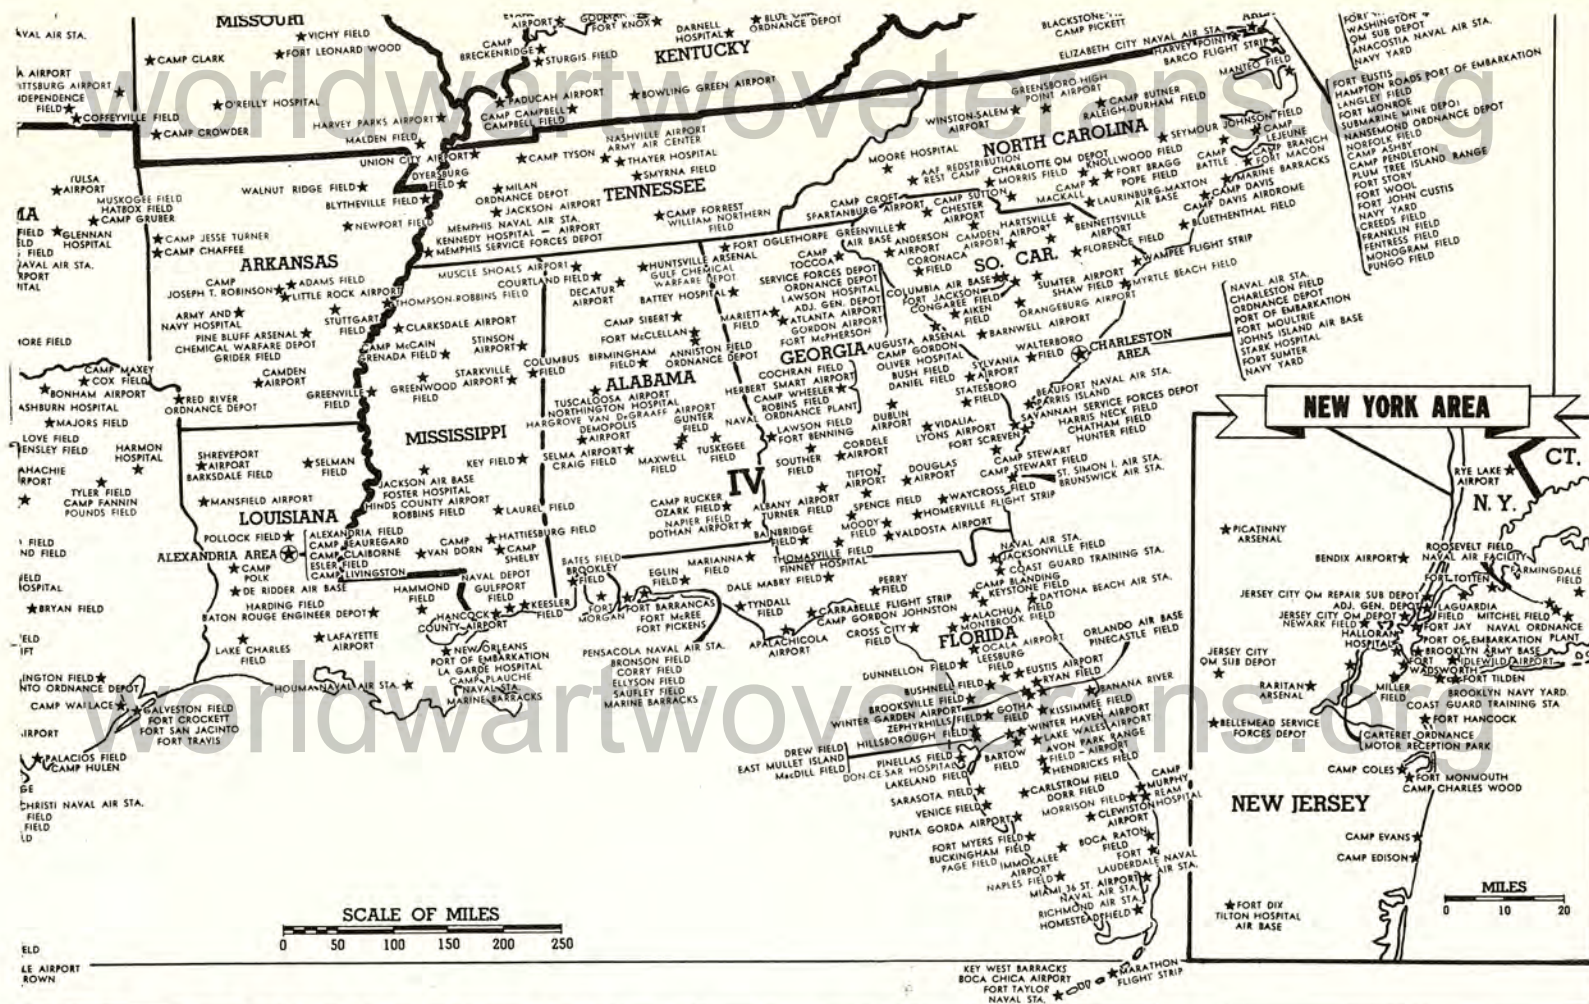

ONE OF THE SECRETS of U.S. success in keeping the number of deaths among battle casualties (wounded) at three per cent, was the promptness with which their injuries were attended to. This was due, in no small measure, to the smooth functioning of the Air Evacuation System of handling the wounded.

INTERNATIONAL NEWS PHOTO

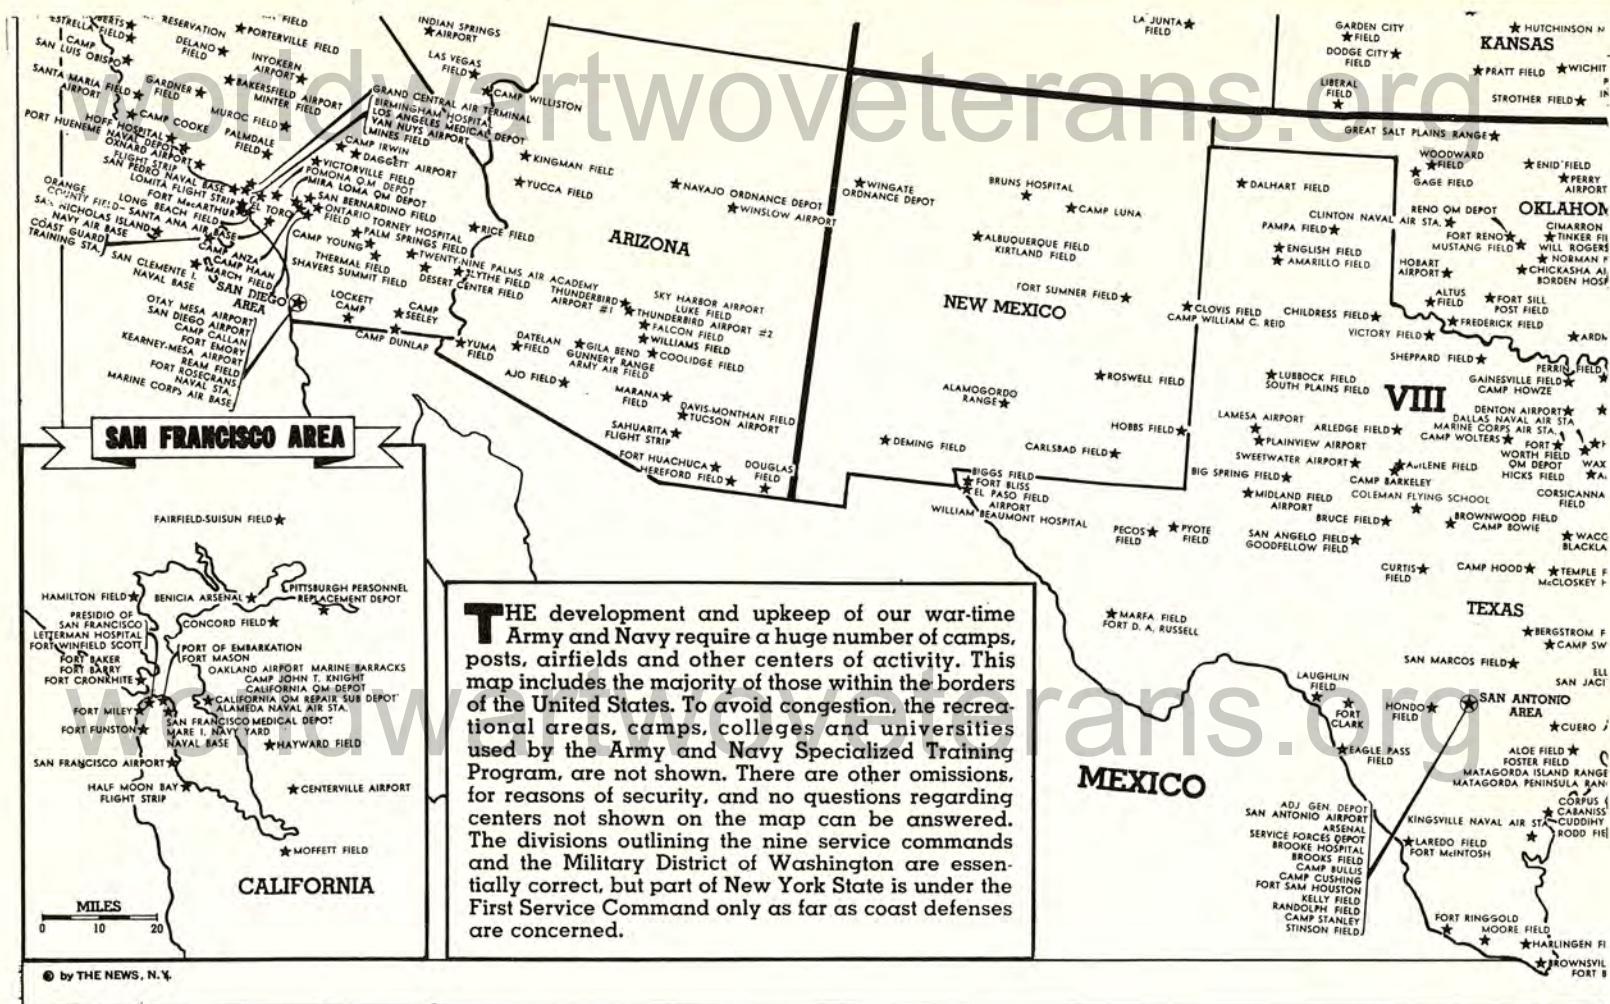

THE BLOOD YOU DONATED is received by a wounded Marine on the beach at Tarawa. The blood plasma flows from a flask on an up-ended rifle. Following the transfusion (to lessen shock and restore blood lost by bleeding) the Marine will be removed to a base hospital for treatment.
